Although there are numerous spots on land that invite relaxation and exploration, the Turks and Caicos are really all about the water. More specifically, they're all about what's beneath the water. These islands have some of the best diving and snorkeling anywhere, courtesy of one of the world's largest network of coral reefs, easily accessible off the islands' shores. Grand Cayman boasts endless beaches that are encircled by coral reefs teeming with an abundance of marine life. On shore, affluent colonial neighborhoods dominate the West Bay area, while the East End affords natural attractions such as spectacular blowholes and fragrant botanical gardens.
